

Statistical Analysis

The figures in the following chart show the price appreciation for various T206 cards since the first Price Guide was published in 1980. The percentages, both annually and cumulatively, compare most favorably with any of the sets we've done previously and the guess is, would compare the same way with those to be done. Further projections can be speculated on when dealers are willing to PAY \$10 for mint cards (when the Price Guide is \$8.50) and similar cards are selling for \$14-15.
